

## Thesis Matching Platform (TMP) Guide: UvA and AUMC Accounts

The repository for GSI MSc theses is called the Thesis Matching Platform (TMP) and is hosted by DataNose. This is an FWNI-wide initiative and will eventually be used by all BSc and MSc programmes in the FWNI. The URL for this platform is: <https://datanose.uva.nl/m/thesismatching>

For more information about the Thesis Fair specifically, including our FAQs please visit our website: <https://informatics.amsterdam/#orgs-faqs>

1. Logging into the TMP is the same as logging into DataNose. The TMP is hosted on DataNose 2.0 and so the URL is different (datanose.uva.nl will eventually replace the existing datanose.nl). This means you will be required to use the Tigr 2FA app in order to log in.
2. Once you log into the TMP, you will be directed to your group/department's page. Here you can see your group's name, website, and other details. If the description and/or website is missing, please click on the button labelled "Edit Organisation Profile", which is in the upper right-hand corner, and fill in the missing information.

- To add your colleagues from your Research Group/department to your group's account, just click on the "+ Add Representative" red button on the right-hand banner. You can then search for your colleagues in the system and add them to the account. They will receive an email notifying them that they have been added to the account.
