Project selection is open

7 OCTOBER 2026

Deadline for uploading
CVs to platform

16 OCTOBER 2026

13:45 - 18:30

Thesis Fair!

ORGANIZED BY THE GSI
UNIVERSITY OF AMSTERDAM

QUESTIONS?

ThesisFair-lvl@uva.nl

Session Information

- The slides from this session will be made available to you on the Thesis Fair website and on Canvas.
- We will not be going over your thesis today. A separate Thesis Information Session will be held by your program.
- The presentation will start with information unrelated to the Thesis Fair: LAB42 SME Datalab. This is an exciting **paid** opportunity for students who are interested and have time/the desire to do a project unrelated to coursework and the Thesis.
- Is anyone here a part-time student in their first year?
- Is anyone here a first year CLSJD or CS student?
- Is there anyone here from anyone here from a VU program other than Computer Science?

UvA

SME

DATALAB

42

Introduction

- The SME DataLAB 42 is part of the larger proposal called The ROBUST Long-Term Program
- At the UvA, the SME DataLAB 42 project will be under the LAB42 umbrella

These are potential side jobs you can do on top of your studies. This is not related to your program, and you do not receive educational credit – just money and valuable work experience.

SME DataLAB 42 Activities

- They will be three major activities undertaken by the SME DataLAB 42 project at the UvA:
 - DataLAB Workshop (Masterclasses)
 - DataLAB Sprint

DataLAB Workshop (Masterclass)

- Present a workshop (1.5 – 2 hours) on a specific AI or data topic to a group of companies
- Students assist on the day of workshop
- Provide 1-hour student support after the session (virtual)
- €25 per hour

Datalab Sprint

- Project carried out by a student at a SME/MKB under the guidance of a project leader
- Project delivers a predetermined deliverable; the project is defined data project solves a concrete issue
- Deliverables can trend analysis, dashboard development or even predictive models

Datalab Sprint

- 8-10 weeks
- 60-80 working hours total or 6-8 hrs per week
- € 2.000 for 60-80 hours' worth of work

Intake Procedure

- Email to show interest and will be added to mailing list
- Apply for interested project proposals through emailing CV and short (1-2 paragraph) motivation and 'fit' to project
- Skills and personality fit evaluated
- Administrative process cleared

What is the Thesis Fair

The Thesis Fair is the opportunity for you to meet with external organisations and research groups and discuss their offered projects with the hope that you will match with one of them.

In order to participate in the Thesis Fair, **you must vote for/select projects on the Thesis Matching Platform (TMP)**. There is no ranking. The order your votes appear are not indicative of first, second or third preference, etc. **The project selection deadline is Thursday, 24 September. You must vote to participate in the event.**

The voting is just to provide some direction for the day. It is equally designed to give you the chance to thoroughly read and review projects and organisations. You will have the opportunity to meet with every single organisation at the event. Please note that there are no set meetings.

The booths/organisations are split between three separate sections of the KIT, with a total of almost 40 organisations across the venue. Students will be split into three separate groups and each group will have an hour per section. After each hour is up, your group will be rotated to the next section.

Thesis Fair Quick Facts

- About 35 organisations participating in the Thesis Fair. A diverse group of large corporations, startups, hospitals, government agencies, and UvA research groups.
- 6 MSc programs participating: MSc Computational Science, MSc Computer Science, MSc Information Studies, MSc Logic, MSc Software Engineering, and MSc Security and Network Engineering.
- There will be about 300-400 students attending with over 150-200 representatives from 35 different organisations.

Thesis Fair Program – Afternoon of Friday, 16 October

Registration: 13:45 at the Royal Tropical Institute (KIT)

Open Marketplace: 14:30 – 17:30

Round 1: 14:30 – 15:30

Round 2: 15:30 – 16:30

Round 3: 16:30 – 17:30

Borrel: 17:30 – 18:30

Please note that lunch will **not** be provided.

**YOU MUST VOTE
FOR/SELECT PROJECTS
IN ORDER TO
PARTICIPATE IN THE
THESIS FAIR**

**Selection deadline:
Thursday,
24 September (midnight)**

Thesis Matching Platform (TMP)

<https://datanose.uva.nl/m/thesismatching>

Thesis Projects

- All projects are listed on the Thesis Matching Platform: <https://datanose.uva.nl/m/thesismatching>
- When you are logged into the platform you will automatically see only the projects available for your program.
- There are two types of projects:
 - Internal projects with one of our Research Groups (you can filter for these by typing in University of Amsterdam into the search bar).
 - You can contact the researcher who posted the internal project directly if you are interested.
 - External projects with an external organisation (usually matched through the Thesis Fair)
 - Some external organisations are not participating in the Thesis Fair but have submitted projects to the Marketplace. You can contact them directly if you are interested in one of those projects.

The screenshot displays the 'Thesis Matching Platform' interface. At the top, the navigation bar includes the DataNose logo, the text 'DataNose > Thesis Matching Platform', a language dropdown set to 'EN', and a user profile icon. Below the navigation bar, there are tabs for 'Dashboard' and 'Organisations'. The main content area is divided into sections. On the left, under the 'Projects' heading, there are statistics for 'Selected Projects' (0) and 'Available Projects' (12), followed by a table with a 'Project Name' header and a row indicating 'No projects have been selected. Select projects to see them here.' On the right, there is a card for 'Master Software Engineering' with a red 'Upload resume' button. A modal window titled 'Upload resume' is centered on the screen. It contains the text 'Your resume will be shared with organisations when you select projects.' and a dashed box for file upload. Inside the box, it says 'Pick a file or drag & drop it here' and 'Allowed file types: .pdf (max. 5 mb)'. Below the box is a red 'Select file' button. At the bottom of the modal are 'Cancel' and 'Save' buttons.

Deadline for uploading your CV is 7 October

Thesis Fair Platform – Double Asterisks (**)

- If a project has a double asterisk (**) in the project title, then that means that organisation will be at the Thesis Fair and you can talk to that organisation.
- Keep in mind that the specific Project Holder of the project you are interested in may not be at the event. But you can talk to their colleagues about the research themes and what it is like to work/research at their organisation.

This organisation will be represented at the Thesis Fair

****** Shape the Future of Risk Management with AI, Data & Automation

Kouters Van der Meer

****** Automatic Concept Generation and Quality Assessment for Text Bottleneck Models

KPN

This organisation will **NOT** be represented at the Thesis Fair

Feasibility study on SQL error detection with LLMs

University of Amsterdam: INDE Lab

Thesis Fair Platform – Double Asterisks (**)

- If a project has a double asterisk (**) in the project title, then that means that organisation will be at the Thesis Fair and you can talk to that organisation.
- Keep in mind that you will not see all the participating organisations on your Dashboard. You only see projects tagged for your program.
 - For example, the company Info Support only has Software Engineering projects. If you are a student in Computational Science, you will not see Info Support's projects on the TMP. But Info Support will be at the event.
- You are welcome to speak with all organisations at the event, even if they do not have a project for your program. It is excellent networking practice.
- To participate in the Thesis Fair, you are **required to vote for/select projects** from participating organisations.

Selection deadline: Thursday, 24 September (midnight)

The Dream Project – Voting/Selecting Projects

Unsure which project(s) to select? Ask yourselves the following questions:

- What **research theme** do you like or want?
- Do you like to work in a **small** or **large company**?
- Would you like experience in **industry** or **academia**?
- Working on a **team** or **alone**?
- What kind of **guidance** do you want or need?
- What kind of **skills/expertise** do you have/want to develop?
- What kind of data do you want to have access to?
- Does the project require **English** or **Dutch**?
- What are the **working conditions**?

Project Details

Description

At Solid Sands, we develop a test suite for the C++ standard library. Our goal is to verify that each function in a library implementation (for example, LLVM's libc++) behaves exactly as specified by the C++ standard. The standard provides a detailed specification for every header in the C++ library, including precise declarations of all classes and functions. In C++, much of a function's semantics can be inferred directly from its declaration. Furthermore, the language allows function declarations to be overloaded, adding a layer of complexity that needs to be accounted for.

For example, the function `vector::begin()` has two overloads declared as follows:

```
constexpr iterator begin() noexcept; constexpr const_iterator begin() const noexcept;
```

These declarations provide the following information:

Both functions are constexpr and noexcept. One overload is const. The two overloads have different return types. Both functions take no arguments.

Thesis Fair Platform – Selecting/Voting for Projects

When you select a project, you consent to sharing your profile with the organisation.

The screenshot displays the 'Thesis Matching Platform' interface. At the top, the header includes the DataNose logo, the text 'DataNose · Thesis Matching Platform', a language dropdown set to 'EN', and a user profile icon. Below the header, a navigation bar shows 'Dashboard' and 'Organisations'. The main content area is titled 'Solid Sands' and features a 'Select Project' button in the top right corner. A project card is visible with the title '**A generator for C++ declaration conformance tests', a 'Selection Deadline' of '25 September 2025 00:00', and an 'Available' status. The project card is divided into 'General Information' (showing 'Available Places: 1') and 'Project Details' (with a description and code snippets). A modal dialog titled 'Select Project' is open in the center, containing a warning message, a 'Permission' section with a checked checkbox for sharing resume and contact details, and 'Cancel' and 'Select' buttons. To the right of the modal, a 'Project Contact Person' section lists 'Ahmed Ibrahim' with the email 'ahmed@solidsands.nl'.

Thesis Fair Platform – Selecting/Voting for Projects

Select as many projects as you would like from different organisations. Take a look at all available projects for your program, you may be surprised! There is no limit to how many projects you can select, just as long as you select at least 3-5 projects.

Voting is open and closes on 24 September at midnight.

**YOU MUST VOTE FOR/SELECT
PROJECTS IN ORDER TO
PARTICIPATE IN THE
THESIS FAIR.**

Your CV and Professionalism

- Treat it like a **job interview**
- Wear **professional clothes** and have a clean/tidy appearance.
- **Prepare questions**
- **Research** each organisation you wish to meet
- Maintain **eye contact** if possible
- **Be confident** (not cocky) and **listen** to their questions and be sure to answer them
- Be **respectful**
- **Do not burn any bridges!**
Even if you don't do a project with an organisation, there is a chance you will meet or work with some of these people in future

During the Meetings

Ask if the representative can see your CV (you should have uploaded your CV to the platform)

- Introduce yourself
- Ask for **their name** (or look at their nametag) and use it throughout the meeting
- **Take notes**
- Ask your **prepared questions** and **open questions**
- Check your ideas and assumptions of the organisation
- Check if your ideas and interpretations of the project(s)
- Agree upon further contact and how to contact

Your CV - What to put on your CV

Basic information:

- First and surname
- LinkedIn
- Github
- Website
- Email
- Mobile number
- Address

+ Program name, how long your thesis is, your period of availability for the project.

Include the following descriptions:

- **Profile:** Describe your skills, expertise and ambition in 2-3 sentences each
- **Education:** Which schools you have attended
- **Work experience:** Short sentences with job description and competencies
- Chosen set of courses and research areas of interest
- Internships and volunteering
- A photo is optional but encouraged

Your CV - useful tools and materials

- UvA Careers website - <https://student.uva.nl/en/categories/uva-student-careers-centre>
- Harvard University Careers - <https://ocs.fas.harvard.edu/resumes-cvs-cover-letters>
 - Video on how to write a CV
 - Do's and don'ts
 - Action verbs for your CV

Follow-up After the Thesis Fair

Do you have enough information? If not, then do some research.

Email or call the companies of your preference. **Use the agreed upon contact method.**

Make an appointment to meet with them further.

Note: please remember that a contract is a binding agreement. Only sign the contract if you are sure that you are going to undertake your thesis with them.

Internship Agreements - NDAs

Please contact internshipagreement-science@uva.nl for questions.

A detailed description of the new policy can be found [here](#). You may also find a sample internship agreement form [here](#).

- The UNL model internship agreement is established in consultation with the business community.
- It considers the duty of care and educational task of universities, as well as the competitive position of companies.
- The agreement is applicable to all higher education institutions in the Netherlands and is exclusively for internships within the country.
- No additional Non-Disclosure Agreements or other agreements are accepted.
- Trade secrets and intellectual property rights are adequately protected through the model internship agreement and the national collective labour agreement.
- There is a two-week response period for the removal of confidential information in the thesis or presentation.
- If the internship provider does not respond within this period, the internship report may be published in full and the presentation will continue.
- Exceptions to the agreement, such as longer embargo periods or confidential appendices, must be indicated in the internship agreement form.

Contacts and points of information

Questions about the Thesis Fair? Visit our Student FAQs on <https://informatics.amsterdam/#student-faqs> if you cannot find the answer there, then email thesisfair-lvl@uva.nl

This presentation will be published on the Thesis Fair Student FAQs page.

- If you have any personal concerns or issues please contact your Study Advisor:
- MSc CLSJD: Nils Simonsen, studyadviser-cls-science@uva.nl
- MSc Logic: Tanja Kassenaar, studyadviser-logic-science@uva.nl
- MSc SE: Nils Simonsen, studyadviser-se-science@uva.nl.
- MSc SNE: Andrea Jessen, studyadviser-sne-science@uva.nl
- If you have any specific questions about your thesis, please contact your Thesis Coordinator/Thesis Trajectory Coordinator/Master Project Coordinator. **THIS IS NOT US.**
- If you still have questions after using these resources, then you can email us at thesisfair-lvl@uva.nl. Please note that if you come to us with questions that can be answered by the Thesis Fair website, we will redirect you back to the website.
